ABOUT

The 1st International Conference of Geosciences in the Service of Territorial Development (ICGSTD) will be held from October 28–30, 2025, at Mustapha Ben Boulaid University (Batna 2), Batna, Algeria. This event brings together researchers, practitioners, and policymakers to share innovations in earth-science research for sustainable regional development through lectures, sessions, and workshops.

Mission: To connect geoscientific research with practical territorial planning for resilient, equitable growth.

Vision: To empower communities with geoscience-based solutions for sustainable land use and resource management.

The ICGSTD is hosted by Batna 2 University—home to 24,800 students and 1,335 faculty—ICGSTD will be held in a modern campus auditorium with access to Batna’s rich historical and cultural landmarks.

TOPICS

Our conference is a versatile forum covering geospatial analysis, urban planning, resource conservation, and both fundamental and applied geology. Through sessions, keynotes, and workshops, we connect research with practical solutions for sustainable development.

Applied Geomatics in Geosciences and Territorial Intelligence

Planning, Territorial Development, and Socio-Spatial Inequalities

Fundamental Geology – Earth Processes and Structural Dynamics

Major Risk Management and Territorial Resilience

Tourism, Geodiversity and Geoheritage, Territorial Attractiveness, and Environmental Protection

Climate Change, Hydrogeology, Water Resources: Management and Sustainability

FEATURED SPEAKERS

We sincerely thank all our speakers for their valuable contributions to ICGSTD. The experts highlighted below stand out for their outstanding achievements:

Prof. Mohammed Achite (Hassiba Benbouali University, Algeria) is a leading hydrologist with 130+ publications, focusing on water resources, climate change, and drought prediction using machine learning.

Prof. Moataz Khairy Barakat (Tanta University, Egypt) is a geophysicist specializing in 3D geological modeling, seismic interpretation, and reservoir analysis across key Egyptian regions.

Prof. Risheng Chu (Chinese Academy of Sciences, China) is a seismologist with 140+ publications, known for his work on seismic wave propagation and geodynamics.

Prof. Chérifa Abdelbaki leads the Water Resources and Mobilization team at EOLE Lab, with expertise in water management, GIS, and sustainable development, authoring over 70 works.

Prof. Krim Louhab (University of M'Hamed Bougara Boumerdes, Algeria) is an environmental engineer with 40+ publications and 400+ citations, recognized for his research in wastewater treatment, bio-sorption, and sustainable pollution control.

Pr. Achite Mohammed

Pr. Risheng Chu

Pr. Abdelbaki Cherifa

Pr. Moataz Barakat

Pr. Krim Louhab

SUBMISSION

Abstract submission is a straightforward process to be completed via the official website icgstd.com. For guidance, please refer to the instructional video below outlining each step of the submission procedure.

SUBMIT NOW!

A specific template is not required for your submission, as the system will automatically handle the formatting. However, if you need a Word file, please click on this paragraph to download the optional template.

KEY DATES

- **Acceptance Notifications:** All decisions of the Scientific Committee will be communicated by email. If you do not receive your notification, please check your SPAM or junk folder.
- **Invitation Letters for Visa:** Non-Algerian participants should contact us ASAP to request an official invitation letter for visa application.
- **Registration Confirmation:** Confirmations will be issued exclusively via email; you will receive a reminder when your registration has been processed
